

Attention Soccer Players/Parents

Below is some information about our Charter Soccer team for the 2019 Fall Season.

Sussex Charter School has a Fall Soccer team that plays games Away vs 4-5 different schools in the area. We are starting the season (First Practice) on September 9 and September 18 with our first game at NW Christian on September 19 (Thursday). The start of the season is light on practices with a gap between our first and second because I am going to New Mexico for 6 days for my Level 3 MovNat Certification (Professional Development). There are a bunch of forms for you to fill out for the beginning of the season and they need to be returned to myself (Mr. Fialcowitz) or the school nurse by the start of our first practice (September 9). Over the summer you can return them to the main office and they will place them in our mailboxes for the start of the school year.

Practice: On the Calendar supplied, you will find the practice dates. We practice at our school until 4 and a parent needs to pick up their athlete by 4 p.m..

Games: On the Calendar supplied, you will find the game dates. All games are away because we don't have a home field. We have busing from Charter to these fields. You will also find the approximate start time on the Calendar as well. Each school is a little different because of the tie we get out. The bus will bring us back to Charter by 6 p.m.. You are more than welcome to come and watch the games and take your athlete home from the field.

Uniforms: We supply a Jersey (Blue) but no Shorts or Socks. I recommend Black Shorts and Socks. Cleats and Shinguards are a must as well.

Additional Information: With the amount of athletes that play (around 30 usually) I make 2 teams. A varsity team and a Junior Varsity team. Based on skill level, experience, and size these teams are made and that is the team that athlete has the most playing time on. On Game days, the Varsity usually plays the first game followed by the JV team. Sometimes we play a half of Varsity and a half of JV then back to Varsity and then finish with JV.

I hope you find this information useful. If you have any more questions feel free to email me

Nick Fialcowitz-nfialcowitz@sussexcharter.org

REMIND 101 APP. I use the remind 101 app to communicate quickly to all parents and players about information throughout the season. Please sign up to the 2019 Charter Soccer Team page using the directions I have in this packet. If you have any questions about how to do this please feel free to email me.

I look forward to seeing you in the fall.

Soccer Team Permission Form

To: Participate on the SCCST Soccer Team

Dates: 9/9/2019-10/23/2019

Practices: Mondays, Tuesday's, Wednesdays & Thursday's

Departure for Home: Parental Pick-Up from Practice at Charter

******These days or additional days may vary on Game Days – To Be Announced. Practices may be cancelled due to inclement weather.**

******On Tues. and Thurs. we are done with practice @ approximately 4:00. Please be on time for picking up your athlete.**

Please sign below and return bottom portion only to Mr. Fialcowitz. **Form must be returned for participation.** Thank you for your cooperation.

Cut here*****

I/We give our permission for our child, _____, to participate on the SCCST Soccer Team. I understand that the students will be finishing up practice and be ready for parental pick up at 4:00 p.m. on Tuesday & Thursdays.

EMERGENCY INFORMATION: (I.E./allergies, bee stings, medications, etc.)

Soccer Team Ride Permission Form

This permission form is for all away games. Game Dates on the attached Calendar:

Please fill out and return to me by, **September 9, 2019**. This is to verify how your child will be getting home after the games.

Please sign below and return to Mr. Fialcowitz. **Form must be returned by Monday 9/9/19 by the end of the day.** Thank you for your cooperation.

I/We give our permission for our child, _____, to:

Take the bus back to the school where I will pick them up at 5:30

Be picked up by _____ at the game. I certify that this person is over 18 years of age.

SUDDEN CARDIAC DEATH IN YOUNG ATHLETES

The Basic Facts on Sudden Cardiac Death in Young Athletes

STATE OF NEW JERSEY
DEPARTMENT OF EDUCATION

Learn and Live

SUDDEN CARDIAC DEATH IN YOUNG ATHLETES

Sudden death in young athletes between the ages of 10 and 19 is very rare. What, if anything, can be done to prevent this kind of tragedy?

What is sudden cardiac death in the young athlete?

Sudden cardiac death is the result of an unexpected failure of proper heart function, usually (about 60% of the time) during or immediately after exercise without trauma. Since the heart stops pumping adequately, the athlete quickly collapses, loses consciousness, and ultimately dies unless normal heart rhythm is restored using an automated external defibrillator (AED).

How common is sudden death in young athletes?

Sudden cardiac death in young athletes is very rare. About 100 such deaths are reported in the United States per year. The chance of sudden death occurring to any individual high school athlete is about one in 200,000 per year.

Sudden cardiac death is more common: in males than in females; in football and basketball than in other sports; and in African-Americans than in other races and ethnic groups.

What are the most common causes?

Research suggests that the main cause is a loss of proper heart rhythm, causing the heart to quiver instead of pumping blood to the brain and body. This is called ventricular fibrillation (ven-TRICK-you-lar fib-roo-LAY-shun). The problem is usually caused by one of several cardiovascular abnormalities and electrical diseases of the heart that go unnoticed in healthy-appearing athletes.

The most common cause of sudden death in an athlete is hypertrophic cardiomyopathy (hi-per-TRO-fic CAR-dee-oh-my-OP-a-three) also called HCM. HCM is a disease of the heart with abnormal thickening of the heart muscle, which can cause serious heart rhythm problems and blockages to blood flow. This genetic disease runs in families and usually develops gradually over many years.

The second most likely cause is congenital (con-JEN-it-al) (i.e., present from birth) abnormalities of the coronary arteries. This means that these blood vessels are connected to the main blood vessel of the heart in an abnormal way. This differs from blockages that may occur when people get older (commonly called "coronary artery disease," which may lead to a heart attack).

SUDDEN CARDIAC DEATH IN YOUNG ATHLETES

Other diseases of the heart that can lead to sudden death in young people include:

- Myocarditis (my-oh-car-DIE-tis), an acute inflammation of the heart muscle (usually due to a virus).
- Dilated cardiomyopathy, an enlargement of the heart for unknown reasons.
- Long QT syndrome and other electrical abnormalities of the heart which cause abnormal fast heart rhythms that can also run in families.
- Marfan syndrome, an inherited disorder that affects heart valves, walls of major arteries, eyes and the skeleton. It is generally seen in unusually tall athletes, especially if being tall is not common in other family members.

Are there warning signs to watch for?

In more than a third of these sudden cardiac deaths, there were warning signs that were not reported or taken seriously. Warning signs are:

- Fainting, a seizure or convulsions during physical activity;
- Fainting or a seizure from emotional excitement, emotional distress or being startled;
- Dizziness or lightheadedness, especially during exertion;
- Chest pains, at rest or during exertion;

- Palpitations - awareness of the heart beating unusually (skipping, irregular or extra beats) during athletics or during cool down periods after athletic participation;
- Fatigue or tiring more quickly than peers; or
- Being unable to keep up with friends due to shortness of breath.

What are the current recommendations for screening young athletes?

New Jersey requires all school athletes to be examined by their primary care physician ("medical home") or school physician at least once per year. The New Jersey Department of Education requires use of the specific Annual Athletic Pre-Participation Physical Examination Form.

This process begins with the parents and student-athletes answering questions about symptoms during exercise (such as chest pain, dizziness, fainting, palpitations or shortness of breath); and questions about family health history.

The primary healthcare provider needs to know if any family member died suddenly during physical activity or during a seizure. They also need to know if anyone in the family under the age of 50 had an unexplained sudden death such as drowning or car accidents. This information must be provided annually for each exam because it is so essential to identify those at risk for sudden cardiac death.

The required physical exam includes measurement of blood pressure and a careful listening examination of the heart, especially for murmurs and rhythm abnormalities. If there are no warning signs reported on the health history and no abnormalities discovered on exam, no further evaluation or testing is recommended.

When should a student athlete see a heart specialist?

If the primary healthcare provider or school physician has concerns, a referral to a child heart specialist, a pediatric cardiologist, is recommended. This specialist will perform a more thorough evaluation, including an electrocardiogram (ECG), which is a graph of the electrical activity of the heart. An echocardiogram, which is an ultrasound test to allow for direct visualization of the heart structure, will likely also be done. The specialist may also order a treadmill exercise test and a monitor to enable a longer recording of the heart rhythm. None of the testing is invasive or uncomfortable.

Can sudden cardiac death be prevented just through proper screening?

A proper evaluation should find most, but not all, conditions that would cause sudden death in the athlete. This is because some diseases are difficult to uncover and may only develop later in life. Others can develop following a normal screening evaluation, such as an infection of the heart muscle from a virus.

This is why screening evaluations and a review of the family health history need to be performed on a yearly basis by the athlete's primary healthcare provider. With proper screening and evaluation, most cases can be identified and prevented.

Why have an AED on site during sporting events?

The only effective treatment for ventricular fibrillation is immediate use of an automated external defibrillator (AED). An AED can restore the heart back into a normal rhythm. An AED is also life-saving for ventricular fibrillation caused by a blow to the chest over the heart (commotio cordis).

Effective September 1, 2014, the New Jersey Department of Education requires that all public and nonpublic schools grades K through 12 shall:

- Have an AED available at every sports event (three minutes total time to reach and return with the AED);
- Have adequate personnel who are trained in AED use present at practices and games;
- Have coaches and athletic trainers trained in basic life support techniques (CPR); and
- Call 911 immediately while someone is retrieving the AED.

HEALTH HISTORY UPDATE QUESTIONNAIRE

Name of School _____

To participate on a school-sponsored interscholastic or intramural athletic team or squad, each student whose physical examination was completed more than 90 days prior to the first day of official practice shall provide a health history update questionnaire completed and signed by the student's parent or guardian.

Student _____ Age _____ Grade _____

Date of Last Physical Examination _____ Sport _____

Since the last pre-participation physical examination, has your son/daughter:

1. Been medically advised not to participate in a sport? Yes _____ No _____

If yes, describe in detail _____

2. Sustained a concussion, been unconscious or lost memory from a blow to the head? Yes _____ No _____

If yes, explain in detail _____

3. Broken a bone or sprained/strained/dislocated any muscle or joints? Yes _____ No _____

If yes, describe in detail _____

4. Fainted or "blacked out?" Yes _____ No _____

If yes, was this during or immediately after exercise? _____

5. Experienced chest pains, shortness of breath or "racing heart?" Yes _____ No _____

If yes, explain _____

6. Has there been a recent history of fatigue and unusual tiredness? Yes _____ No _____

7. Been hospitalized or had to go to the emergency room? Yes _____ No _____

If yes, explain in detail _____

8. Since the last physical examination, has there been a sudden death in the family or has any member of the family under age 50 had a heart attack or "heart trouble?" Yes _____

9. Started or stopped taking any over-the-counter or prescribed medications? Yes _____ No _____

If yes, name of medication(s) _____

Date: _____ Signature of parent/guardian _____

PREPARTICIPATION PHYSICAL EVALUATION HISTORY FORM

(Note: This form is to be filled out by the patient and parent prior to seeing the physician. The physician should keep a copy of this form in the chart.)

Date of Exam _____

Name _____ Date of birth _____

Sex _____ Age _____ Grade _____ School _____ Sport(s) _____

Medicines and Allergies: Please list all of the prescription and over-the-counter medicines and supplements (herbal and nutritional) that you are currently taking

Do you have any allergies? Yes No If yes, please identify specific allergy below.

Medicines Pollens Food Stinging Insects

Explain "Yes" answers below. Circle questions you don't know the answers to.

| GENERAL QUESTIONS | Yes | No |
|--|-----|----|
| 1. Has a doctor ever denied or restricted your participation in sports for any reason? | | |
| 2. Do you have any ongoing medical conditions? If so, please identify below: <input type="checkbox"/> Asthma <input type="checkbox"/> Anemia <input type="checkbox"/> Diabetes <input type="checkbox"/> Infections Other: _____ | | |
| 3. Have you ever spent the night in the hospital? | | |
| 4. Have you ever had surgery? | | |
| HEART HEALTH QUESTIONS ABOUT YOU | Yes | No |
| 5. Have you ever passed out or nearly passed out DURING or AFTER exercise? | | |
| 6. Have you ever had discomfort, pain, lightheadedness, or pressure in your chest during exercise? | | |
| 7. Does your heart ever race or skip beats (irregular beats) during exercise? | | |
| 8. Has a doctor ever told you that you have any heart problems? If so, check all that apply: <input type="checkbox"/> High blood pressure <input type="checkbox"/> A heart murmur <input type="checkbox"/> High cholesterol <input type="checkbox"/> A heart infection <input type="checkbox"/> Kawasaki disease Other: _____ | | |
| 9. Has a doctor ever ordered a test for your heart? (For example, ECG/EKG, echocardiogram) | | |
| 10. Do you get lightheaded or feel more short of breath than expected during exercise? | | |
| 11. Have you ever had an unexplained seizure? | | |
| 12. Do you get more tired or short of breath more quickly than your friends during exercise? | | |
| HEART HEALTH QUESTIONS ABOUT YOUR FAMILY | Yes | No |
| 13. Has any family member or relative died of heart problems or had an unexpected or unexplained sudden death before age 50 (including drowning, unexplained car accident, or sudden infant death syndrome)? | | |
| 14. Does anyone in your family have hypertrophic cardiomyopathy, Marfan syndrome, arrhythmogenic right ventricular cardiomyopathy, long QT syndrome, short QT syndrome, Brugada syndrome, or catecholaminergic polymorphic ventricular tachycardia? | | |
| 15. Does anyone in your family have a heart problem, pacemaker, or implanted defibrillator? | | |
| 16. Has anyone in your family had unexplained fainting, unexplained seizures, or near drowning? | | |
| BONE AND JOINT QUESTIONS | Yes | No |
| 17. Have you ever had an injury to a bone, muscle, ligament, or tendon that caused you to miss a practice or a game? | | |
| 18. Have you ever had any broken or fractured bones or dislocated joints? | | |
| 19. Have you ever had an injury that required x-rays, MRI, CT scan, injections, therapy, a brace, a cast, or crutches? | | |
| 20. Have you ever had a stress fracture? | | |
| 21. Have you ever been told that you have or have you had an x-ray for neck instability or atlantoaxial instability? (Down syndrome or dwarfism) | | |
| 22. Do you regularly use a brace, orthotics, or other assistive device? | | |
| 23. Do you have a bone, muscle, or joint injury that bothers you? | | |
| 24. Do any of your joints become painful, swollen, feel warm, or look red? | | |
| 25. Do you have any history of juvenile arthritis or connective tissue disease? | | |

| MEDICAL QUESTIONS | Yes | No |
|---|-----|----|
| 26. Do you cough, wheeze, or have difficulty breathing during or after exercise? | | |
| 27. Have you ever used an inhaler or taken asthma medicine? | | |
| 28. Is there anyone in your family who has asthma? | | |
| 29. Were you born without or are you missing a kidney, an eye, a testicle (males), your spleen, or any other organ? | | |
| 30. Do you have groin pain or a painful bulge or hernia in the groin area? | | |
| 31. Have you had infectious mononucleosis (mono) within the last month? | | |
| 32. Do you have any rashes, pressure sores, or other skin problems? | | |
| 33. Have you had a herpes or MRSA skin infection? | | |
| 34. Have you ever had a head injury or concussion? | | |
| 35. Have you ever had a hit or blow to the head that caused confusion, prolonged headache, or memory problems? | | |
| 36. Do you have a history of seizure disorder? | | |
| 37. Do you have headaches with exercise? | | |
| 38. Have you ever had numbness, tingling, or weakness in your arms or legs after being hit or falling? | | |
| 39. Have you ever been unable to move your arms or legs after being hit or falling? | | |
| 40. Have you ever become ill while exercising in the heat? | | |
| 41. Do you get frequent muscle cramps when exercising? | | |
| 42. Do you or someone in your family have sickle cell trait or disease? | | |
| 43. Have you had any problems with your eyes or vision? | | |
| 44. Have you had any eye injuries? | | |
| 45. Do you wear glasses or contact lenses? | | |
| 46. Do you wear protective eyewear, such as goggles or a face shield? | | |
| 47. Do you worry about your weight? | | |
| 48. Are you trying to or has anyone recommended that you gain or lose weight? | | |
| 49. Are you on a special diet or do you avoid certain types of foods? | | |
| 50. Have you ever had an eating disorder? | | |
| 51. Do you have any concerns that you would like to discuss with a doctor? | | |
| FEMALES ONLY | Yes | No |
| 52. Have you ever had a menstrual period? | | |
| 53. How old were you when you had your first menstrual period? | | |
| 54. How many periods have you had in the last 12 months? | | |
